

Vinyl format

11/24/2017

16:42

Hello, I have received the proposal to consume audio in formats not only of CDs but also the offer of discs in vinyl format. It occurs to me that the position of Latin American is willing to incorporate a team that is made in Italy for this need an importer for the south merco both the discs that want to sell on the one hand and the other is to find who buys and distribute and sell the records to Latin America. The Italian team also supports CDs and has remote control and the vinyl is also searched for tracks. I think it is a good possibility for investors who wish to invest in the importation of the record player an excellent opportunity for the market that wants to sell CDs and vinyl records and for the importer in Latin America.
